

## Open access research in interdisciplinary nanomedicine

All articles are freely  
available to read,  
download and share.

### Core areas of interest:

- Advances through consolidation of multiple areas
- Applications of new materials and biological concepts
- Targeted delivery
- Molecular biomaterials
- Nanotechnology in diagnostics, pharmacology, pharmaceuticals, toxicology, and clinical outcomes

### Reasons to publish with JOIN:

- Immediately open access
- High standard, rigorous peer review
- Quality and reputation
- Authors retain copyright
- Compliance with institutional and funder mandates
- Fast publication
